

FIGHTER GENERAL SPECIFICATIONS SHEET

Flight Bikes are for riders who truly want to make a bike their own. We offer the options that we do so that each bike can be fitted to the personality of the rider. Adjustable travel is just the beginning. We offer ten standard and two optional frame colors and seven anodized linkage and dropout colors. If a rider wants

a custom color, we'll paint the frames accordingly. Just give us the paint code. The dropouts are offered in standard 135mm QR. Other dropout options (thru-axle and possibly Maxle or horizontal) will be available in the future.

The Flight Fighter is simply one of the best all-purpose trail bikes on the market. With crisp pedaling performance, a 5.5 pound frame weight (medium with Fox RP3) and between 4.0 and 5.5 inches of adjustable travel, the Fighter can be used as an XC racer or as an epic back country weapon.

Features include:

- Easton 7000 series custom aluminum tubing
- 4.0-5.5" of travel, 5.5 lb. frame weight
- 10 standard colors
- 2 optional colors & unlimited custom colors
- Fully replaceable dropouts
- 7 anodized colors for the linkage and dropouts
- Max fork axle-crown length of 520mm (up to 145mm travel)
- Offset water bottle cage mounts for increased clearance
- Engraved logo on the head tube
